

Marion LAGADIC

marion.lagadic@gmail.com | French citizen | Eligible to work in the UK | Personal website: marionlagadic.com

Feminist economic geographer specialising in everyday urban mobilities, having recently submitted my DPhil thesis at the University of Oxford. My research examines how the organisation of work and care shapes everyday mobility practices and experiences of urban space, and how these practices are recognised in transport policy. I am a Lecturer and Course Convenor at Sciences Po, where I designed and teach a postgraduate course on Mobilities and Inclusiveness, alongside my role as a Policy Analyst and Project Manager at the OECD. I have over ten years of experience conducting and managing research projects across academic, public policy and applied research settings.

Research interests: Feminist economic geography; mobilities; care and social reproduction; gender and mobility; urban geography; transport and mobility policy; Japan.

Education

DPhil (PhD) in Sustainable Urban Development University of Oxford <i>Rethinking the link between gender and mobility through a feminist economic geography of cycling in Tokyo</i> Supervisor: Dr. Nihan Akyelken	2019 - 2026 (Part-time) Submitted on 30 August 2026 Viva scheduled on 26 October 2026 Examiners: Dr. Anna Plyushteva and Dr. Tanu Priya Uteng
MSc in Regional and Urban Planning Studies (RUPS), LSE	2014-2015, <i>With Distinction</i>
Masters in Urban Policy, Sciences Po	2013-2015, <i>With Distinction</i>
Urban Sociology (Exchange), University of Chicago	2012-2013, 4.0 GPA
Bachelor, Sciences Po	2010-2013, <i>With Distinction</i>

Teaching and Supervision

Lecturer (Course convenor), Sciences Po, Paris <i>Master's programme in Territorial and Urban Strategies</i>	Since September 2023
- Designed and delivered an original postgraduate course on inclusive urban mobility planning and policy, encouraging students to mobilise academic research to critically assess policy frameworks and their own future professional practices - Developed the full syllabus, including conceptual framing, readings and assessment structure - Provided individual feedback and academic support to students - Contributed to departmental teaching meetings and the development of the Master's programme	
Dissertation Supervision and Academic Mentoring, Sciences Po Paris	2020-2021
- Supervised a dissertation as part of the Executive Master's in Territorial Governance and Urban Development - Provided one-to-one guidance on research design, methodology, and academic writing	

Guest Lecturer, Various Universities**2017-Today**

- Vienna University of Technology: "A gendered cycling culture: the case of Tokyo"
- Ihedate (Executive-level training programme associated with Sciences Po): "Introduction to inclusion and equity in urban transport policy"
- Paris-Belleville School of Architecture: "Introduction to mobilities research through the case study of Tokyo"
- HafenCity Universität Hamburg: "Introduction to shared micromobility services: use patterns, user profiles and governance"
- Université Lyon 2 (Lyon): "Alternative mobility and shared mobility services"
- Sciences Po Paris: "Congestion charging, toll taxing and environmental taxes: political rationale, microeconomic theory, fairness and alternatives"

Mentoring and Team Supervision, Professional context**2016-Today**

- Supervised junior researchers and project managers in applied research settings
- Provided structured feedback, guidance and capacity-building support

Research and Professional Appointments

Policy Analyst & Project Manager, OECD, Paris**Since October 2022**

International Transport Forum (ITF) from October 2022 to October 2024, Inclusive Growth in Cities Unit (CFE-CITY) from November 2024 to today.

- Lead applied policy research projects on sustainable and inclusive cities, urban mobility planning, data governance, with comparative urban policy analyses at the core of my work
- Designed and launched a working group on vision-led transport planning across 15 member countries
- Led dialogue with the Japanese government, contributing to the development of a gender mainstreaming strategy by the Japanese Ministry of Land, Infrastructure, Transport and Tourism
- Engaged with major funders including Bloomberg Philanthropies, the FIA Foundation, the European Commission and the Japanese government

Scientific Director, 6t, Paris**August 2021 - September 2022**

6t is a consultancy specialised in sustainable urban mobility and transport. Clients include local authorities and companies

- Directed research strategy and methodological design for projects on sustainable and data-enabled urban mobility, always exploring the tensions between sustainable mobility practices and the organisation of everyday life
- Developed qualitative and quantitative research protocols across multiple studies
- Supervised a multidisciplinary research team (3 project managers; 7 research officers)
- Oversaw grant applications, research dissemination and quality control of all outputs

Project Manager, 6t, Paris**November 2016 - July 2021**

- Led applied research projects for public authorities and private stakeholders on sustainable urban mobility
- Designed and conducted mixed-methods research (survey design, data analysis, interviews, workshops)
- Produced policy recommendations on equity, modal shift, and sustainable mobility transitions
- Evaluated business models and regulatory frameworks in emerging mobility sectors

Other: Consultant at CITY Linked, Paris (2015-16); Research Officer at the King's Foundation, London (2014-2015)

Publications

WORK IN PROGRESS

"More helpful than Dad?" Mamachari cycling, motherhood and agency in Tokyo. Under review (Minor revisions requested), Gender, Place & Culture

This article argues that, in the context of Tokyo, mothers' reliance on cycling is shaped by a context of structural gender inequalities. Cycling enhances everyday agency in managing care and work, while simultaneously reflecting and sustaining the gendered organisation of reproduction

"I just ride as I feel": Care on the move and the gendered experience of cycling space in Tokyo. In preparation. Target journal: Mobilities

This article examines the cognitive labour of caring while cycling and how simultaneous demands of care and navigation shape situated judgements of urban infrastructure.

Whose cycling counts? Policy discourses, problem representation and the invisibilisation of care in Tokyo's cycling strategies. In preparation. Target journal: IJURR

This article examines how problem framings and interpretive practices make care-based cycling statistically visible in transport policy while marginalising its wider role in social reproduction.
